

Project Design Phase-II

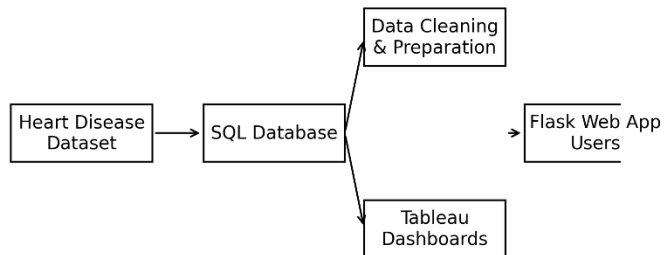

Data Flow Diagram & User Stories

Date	6 th March 2026
Team ID	
Project Name	Heart Disease Analysis
Maximum Marks	4 Marks

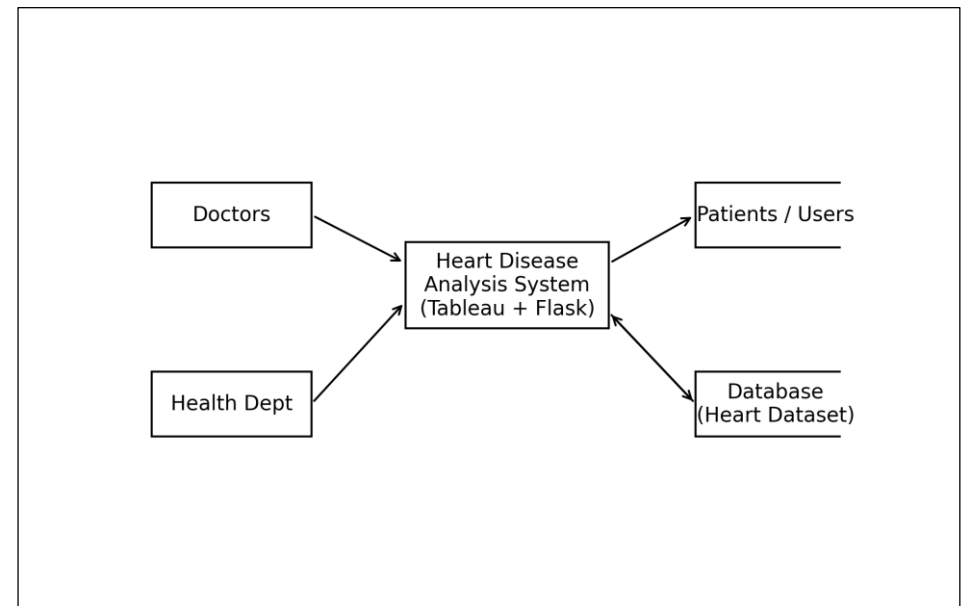

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Example: [\(Simplified\)](#)

Example: DFD Level 0 (Industry Standard)

User Stories

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Doctor	Data Analysis	USN-1	As a doctor, I want to view patient health data in dashboards so that I can identify heart disease risk factors.	Doctor can view charts and dashboards	High	Sprint-1
Doctor	Patient Risk Identification	USN-2	As a doctor, I want to analyze cholesterol, blood pressure, and BMI trends to detect high-risk patients.	Risk groups displayed in visualization	High	Sprint-1
Government Health Department	Policy Analysis	USN-3	As a health official, I want to analyze heart disease trends across regions to design preventive policies.	Regional data insights available	High	Sprint-2
Researcher	Data Insights	USN-4	As a researcher, I want to explore correlations between lifestyle factors and heart disease.	Interactive filters available	Medium	Sprint-2
User / Patient	Risk Awareness	USN-5	As a user, I want to see how lifestyle factors affect heart disease risk.	Dashboard shows lifestyle indicators	Medium	Sprint-2
Admin	Data Management	USN-6	As an admin, I want to manage datasets stored in the database.	Data can be updated or modified	High	Sprint-1
